

Lanico Triple Combi

flanger • necker • seamer

Pre-owned Lanico combination machine refurbished in year 2022, designed for the production of two and three piece necked-in or straight walled aerosol cans. Bottom necked-in to Ø 54 mm and top necked-in to Ø 52 mm. The combination consists of: * BEA 6-341 necking and flanging machine * VAH 6-342 dome seamer / VAH 6-343 cone seamer. The various parts are linked via a star wheel transfer system, which is synchronized with the flanging and seaming heads of the relevant components.
